Benchmark your Project Delivery Methodology  
against the Professional Standards

# INTELLIGENT PROJECT COMPLIANCE

**Benchmark your Project Delivery Methodology against the Professional Standards**

## Strengthen Project Delivery through Methodology Confidence

**Intelligent Project Compliance** is a fast, structured diagnostic that benchmarks your organisation's project delivery methodology against recognised standards. Delivered in just five working days, it gives executive leaders independent, evidence-based insight into how well your method aligns with best practice – highlighting strengths, gaps, and strategic improvement opportunities.

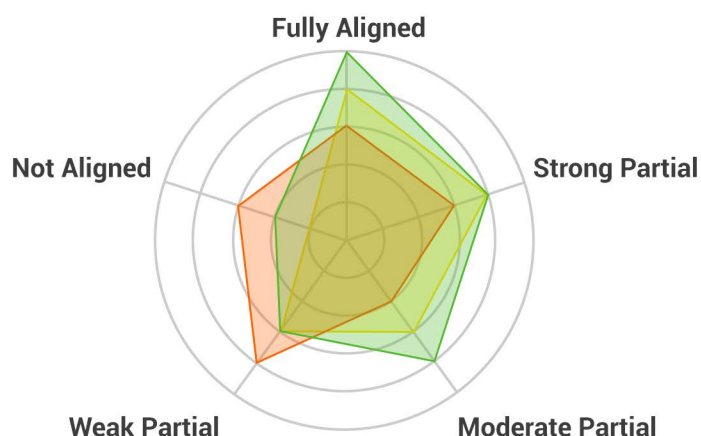

Focused on **project method content** and **structure**, this diagnostic is ideal for organisations preparing for transformation, governance assurance, or AI enablement. Without clear alignment, even well-funded change efforts can be derailed by unseen structural weaknesses in the delivery foundation.

## What to Expect

After your delivery method and comparison standards (e.g. PMI, APM, GPM) are submitted, greyfly.ai performs a clause-level evaluation using a structured five-point alignment framework. You receive a clear, visual report highlighting strengths, misalignments, and improvement opportunities.

### Alignment Dashboard

■ Standard 1 ■ Standard 2 ■ Standard 3

Your organisation's delivery methodology is scored clause by clause against professional project management standards e.g. APMBok, PRINCE2 or GPM P5.

## How It Works

### SHARE

Share your delivery method and standards

### RECEIVE

Obtain your compliance report in 5 working days

### REVIEW

Discuss findings with greyfly.ai delivery leads

## Strategic Value

Project delivery methods are often inherited and evolve over time – without systematic review, benchmarking, or ownership. This leaves critical gaps that quietly affect performance, consistency, and scalability. **This diagnostic gives you confidence before committing to major transformation, assurance reviews, or AI investment.** It strengthens business case development, de-risks strategy decisions, and ensures your delivery model stands up to external scrutiny.

A major UK infrastructure client used this diagnostic to benchmark their methodology against APM and GPM standards. The output revealed key structural gaps in sustainability, tailoring, and benefits management. This shapes their updated delivery approach and informs their AI enablement roadmap.

**This gave us clarity we didn't know we lacked. It saved months of internal debate.**

*Portfolio Lead, Global Engineering Firm*

Once the report is complete, greyfly.ai hosts a short executive readout to walk through findings and co-define next steps.

## Strategic Fit within greyfly.ai Services

**Intelligent Project Compliance** is part of the **Unlock** service line. It also enhances the **Prepare** phase by strengthening AI Adoption Strategies with validated insight into delivery method alignment. Together with Predict and Optimise, this forms a complete transformation journey:

### Prepare

Build AI in Project Management foundations through an adoption strategy and roadmap and validate through Proof of Concept (PoC)s.

### Predict

Leverage AI with Intelligent Project Prediction (IPP) to forecast the most likely project outcomes and enhance decision-making.

### Unlock

AI to extract insight from delivery knowledge, benchmarking methods, surfacing best practice, and unlocking continuous improvement.

### Optimise

Optimise performance by deploying scenario analysis to identify success opportunities and apply guided risks and lessons.

## Why greyfly.ai

greyfly.ai is transforming project management through AI-powered solutions. With over seven years of implementation experience and applied research, we help organisations improve predictability, reduce risk, and optimise outcomes through intelligent forecasting, diagnostics, and strategic transformation. We deliver measurable value across the full project lifecycle and our clients span key sectors and we are trusted by global enterprises.

**Book a call today to boost delivery confidence, assurance, and drive your transformation with structured assessment.**
